

Ride Auditor Job Description:

Print out map and cuesheet. Take with you to make notes/changes, preferably riding a bike. The links for cuesheet includes PDF and editable Excel version. If you own Excel, it would be great if you emailed kob22225@mac.com an edited version after your audit. Otherwise email text suggestions or call 207-415-0364.

- 1) Left - Right - Straight correct?
- 2) Is a turn instruction missing?
- 3) If there is a street sign does it match?
- 4) Is mileage within a couple tenths of mile?
- 5) Complicated turns need special instruction?
- 6) Is the instruction line unnecessary ?
- 7) Are there points of interest to note along the way?

These routes are to show off the area. We will maintain these maps and cuesheets even after the Rally. Therefore we want -more- points of interest noted rather than less, even if not everything is to be covered or stopped at by leader and sweep the day of the Rally ride.

For rides like the **Artisan Ride, Willowbrook Museum...** any other another destination ride, it would be nice to have auditor take ownership for making/maintaining contacts with people at the destination and deciding on best time to be at destination.

Audit Deadlines:

The sooner the better - especially for determining best starting times of destination rides. But we don't make final cuesheets and maps until week before Rally.

Thanks

Ken O'Brien
